

Testing Recruiter User Stories

I want to learn about the developer and who this person is beside the technical skills and view if they also have the right soft skills to assess if they can fit within the team.

1. Click on Skills on the navbar (this will take the user to the skills section)
2. User can now view "Strengths"

I expect to be able to quickly get in contact via an easy to use the contact form so that I can build a relationship or present any job opportunities at hand.

1. Click on Contact (this will take the user all the way to the contact section)
2. User is then able to fill their name
3. User is able to fill email address
 - a. I filled this incorrectly, the form tells the user to fill the email section correctly with an @.
4. User is able to fill their message and press submit
5. User is then greeted with a modal saying 'thanks for the message, I will respond back between 1-2 days'
6. Press close (currently the close button closes but does not refresh the form).

I want the website to provide easy access to contact information, telephone number, email, social media links and a google map link so I am able to ascertain where the developer is based and can quickly contact them with exciting opportunities at hand.

1. User can click on About
 - a. User can find my contact details
2. User can see on the landing page for social media links
 - a. When the user click on a social media icon it leads them to a new browser tab.
3. User can find social media links on footer
 - a. When links are clicked, it opens onto a new browser.
4. Currently there is no map function.

I want to be able to book some time with the developer on their website so that I can avoid time hassle.

1. This feature is not implemented yet.

I want to be able to connect the developer using LinkedIn or professional social media channels to keep up to date with the developer's work history or any changes.

1. The user is able to view the social media links once it lands on the home page
 - a. The user can click on any social media link and it will direct them to a new tab.
 - b. The user can click on LinkedIn and connect with me to view any changes made to my work history.

Having access to CodeSonia's background and work history provides them with a brief overview of CodeSonia's competencies, technical & soft skills

1. Click on Experience
 - a. View the content
 - b. Ability to click on Read more and read less – it works
2. Click on Education
 - a. Able to view the content
 - b. Have the choice to expand content by clicking on read more or less
3. Click on Skills
 - a. User is able to view the content in a visual format.

I want to see a word or pdf format of the CV so that I can assess the candidate's work history and skills to ascertain if they are the right person for the job and pass their details and link the portfolio to my clients

1. On landing page users can click on the Download CV button
 - a. It opens up as a new browser tab
2. Another option is on the footer
 - a. Click on download my CV
 - b. It also opens up a new browser tab
